TE DATED: 08/28/2017 10:41

LOCAL TITLE: PHARMACY

VISIT: 08/28/2017 12:00 PHARMACY

Emil requested that all of his prescriptions have an even number of refills and come due at the same time. I refilled a few of his prescriptions that were last filled on 8-8 a couple days early for him today. Also, I contacted Dr. Mohammed to even up refills on losartan and metformin. I took a telephone order to make the refills even at 5.

PATIENT NAME: FLUTE, EMIL F DOB: MR #

=====

FLUTE, EMIL F presents today and notes -
 Chief Complaint: 67 YO male patient presents to Podiatry clinic for f/u right foot ulcer. See list of allergies.

Forecasted for zoster and pneumo ps but refused.

f/u right foot RA nodule/plantar ulcer, last seen one week ago. No new complaints.

HPI: Teille adhesive dressing with xeroform and 1%SSD cream Q48 hours dressing changes with modified post op shoe with platazote insoles and accomodative aperature.

BMI: 34.46

ALLERGIES: BACTRIM, VERSED, CODEINE, CLINDAMYCIN

VITALS:

BLOOD PRESSURE: 177/91 (May 10, 2017@10:55)

O2 SATURATION: 99 (May 10, 2017@10:55) Qualifiers:

PAIN: 0 (May 10, 2017@10:55)

PULSE: 56 (May 10, 2017@10:55)

RESPIRATIONS: 20 (May 10, 2017@10:55)

TEMPERATURE: 97.4 (36.333 C) (May 10, 2017@10:55)

POD PRESSURE: 169/85 (May 10, 2017@11:00)

OBJECTIVE

Shoegear: modified post op shoe

Ulcer present Focused PE: right foot sub 3rd MPJ ulcer post debridemtn measurement: 3mm x 3mm x 1mm depth, fibrin over red granular wound base, no odor, no drainage, no cellulitis, no button wholing of wound.

ASSESSMENT:

1. Healing RA mal perforans ulcer sub 3rd MPJ of the right foot. Patient responding to current therapies. Concerned with 100% compliance with use of special post op shoe right foot.

PLAN:

1. Sharp debridement of ulcer
2. continue same wound care regimend
3. %1 SSD cream/xeroform/Tielle adhesive dressings q48 hours.
4. F/U in one week.

PATIENT NAME: FLUTE, EMIL F DOB: MR #

=====

FLUTE, EMIL F presents today and notes -

Chief Complaint: 67 YO male patient presents to podiatry clinic for callous to right posterior foot; 1 cm wound noted to right posterior foot. See list of allergies.

Refuse tdap, zoster and pcv-13.

F/U right foot planter ulcer right 3rd MPJ. He been on 6 day road trip, change dressing with 1% SSD cream and Tielle adhesive low profile dressing every 48 hours and ambulating in accomodative platazote shoe with aperature modifications.

VITALS:

BLOOD PRESSURE: 152/80 (May 03, 2017@09:38)
 O2 SATURATION: 95 (May 03, 2017@09:38) Qualifiers:
 PAIN: 0 (May 03, 2017@09:38)
 PULSE: 61 (May 03, 2017@09:38)
 RESPIRATIONS: 20 (May 03, 2017@09:38)
 TEMPERATURE: 97.9 (36.611 C) (May 03, 2017@09:38)

HPI:

Right foot feeling better, wife changed dressing every other day on road trip. I carries n/v/c/f/p to right foot.

Focused PE:

Ulcer size is approx 9mm diameter, partial thickness, fibrin film formation over budding red granular wound base, no odor, less button hole appearance. Shoe accomadations sucessful in off-weighting wound.

Impression:

1.) RA ulcerative nodule healing with current wound therapies. 75% improvement to date with current therapies in the last 3 weeks. We have significant challenges with a very distorted subluxed MPJ's of his right foot.

Plan:

- 1) Sharp debridement performed right foot ulcer.
- 2) Continue same wound therapy regimen.
- 3) Out of tiele, will dispense more tiele tomorrow.

RESPIRATIONS: 18 (Apr 27, 2017@09:15)

TEMPERATURE: 97.3 (36.278 C) (Apr 27, 2017@09:15)

OBJECTIVE

Shoegear: tennis shoes

DERM:

Dressing is C/D/I, drainage minimal, no odor, no erythema, wound is now partial thickness with periwound contracture with red granular wound base. Button hole effect is seen with aperture padding, essential skin on bone palpable diolocated metheads with significant fat pad atrophy, skin normal temp. Wound size: 7mm x 8mm diameter by partial thickness 1-2mm depth, down from 25mm x 15mm full thickness of first visit.

ASSESSMENT:

High risk RA patient with stabilized right foot sub 3rd MPJ. responding to current therapies. Smoking cessation would be beneficial. Transition patient to a lower profiled dressing with a more aggressive mechanical off-weighting of wound in patients shoes.

1. Light wound debridement, continue same wound therapies.
2. Place Spenco base to right shoe, place double thickness 1/4" plastazote insole with wound aperture in right shoe to stabilized mechanical ambulation pressures.

f/u next Wednesday.
